MOBIUS 1111

**Created August 1993.** Studio Dual had just adopted the new "Poplar" typeface as part of its identity a few months before this, but we didn't think it would be a problem using the font for parts of this cover. Little did either party know that Poplar would eventually become so Popular: it's now, sadly, a junk font.

The spine photo shows a piano hoisted into the air by a crane, and about to be dropped. Mercy's drumkit is in the foreground.

Mercy insisted, with all their releases, on having the inside of the folder match the tray card.
